Health Guarantee

Test
Lewisville, TX

Your puppy comes with a one (1) year Health Guarantee that covers congenital health defects for a period of one (1) year from the date of purchase. You must notify the seller (Test) immediately if your puppy becomes ill, does not eat well, or shows any other signs of distress for a period of thirty (30) days from the date of purchase.

The buyer (you) will be required to have your puppy examined by a licensed veterinarian within seventy-two (72) hours of taking possession of your puppy. If your puppy is determined to have any life threatening or genetic defects, you must notify the seller immediately and provide the seller with a written veterinarian's statement that includes the complete diagnosis of the puppy's condition within 48 hours of the diagnosis. We reserve the right to have the diagnosis verified by another veterinarian of our choice and/or require you to have specific tests run on the puppy to verify the diagnosis.

If the puppy is indeed determined to have life threatening illness, the puppy will be replaced with one of equal value as soon as available and only after the puppy and all papers have been returned to the seller. The puppy must not be euthanized without prior written approval from the seller or this guarantee is void. You understand that your puppy will only be replaced if health problems are life threatening and are attributed solely to a hereditary problem and are not due to accident or injury.

If your puppy dies and you are requesting a replacement puppy, you understand that the seller may require a necropsy performed by the state laboratory, at your expense, to determine the cause of death if it is something that the veterinarian cannot determine. Your puppy will be replaced only if death was caused by a covered genetic problem or illness which your puppy had at the time of purchase.

Failure to follow the medical advice and/or treatment instructions of veterinarian or seller will void this guarantee.

Not covered: internal or external parasites, hernia, undescended testicles, under or overbite, injuries, allergies, heat exhaustion, hypoglycemia. Hypoglycemia is preventable with good care and feeding. Because a luxating patella or collapsed trachea can be caused by injury, they are not covered if they are not discovered during your initial examination within 72 hours of taking possession of your puppy. Kennel cough and other communicable diseases are not covered after your veterinarian's initial examination.

This Health Guarantee is void if you fail to meet any of its terms and conditions.
